Water Witch...

Automatic Water Levelling!

Adds a Touch of Class!

Would you fill this pool with a garden hose?

We're Proud of our Pool!!

I'm glad we followed our pool builders advice and installed the Water Witch Automatic Top Up System.

Now we don't ever have to think about topping up our pool, even when we go away. And we never have to worry about expensive damage to pumps and equipment due to low water levels.

The best part is that we never have ugly hoses in our pool to trip people up! We wanted a beautiful environment - and that's just what we got!

The Water Witch takes care of the large amounts of water lost due to diving, splashing, backwashing and evaporation.

With the Water Witch, our pool is as automatic as you can get!

Consider these Benefits:

- One less chore to do - automates your swimming pool one more step
- Easy to install, **"set and forget"**
- **Prevents overflowing** the pool - waste of water and chemical balancers.
- Prevents expensive **equipment damage** from running dry
- Suitable for new pools and balance tanks
- **No moving parts** to wear out or break down
- Continuous **digital display** of water level status
- Designed, manufactured and **tested extensively** in Australia

---

Water Witch has been designed specifically for the pool & spa industry by people IN the industry.

We have listened and learned, over a ten year period, to what YOU the customer asked for.

A water leveller that works... Reliably and Efficiently.

Water Witch is a unique blend of the latest technology in electronics combined with years of experience in the water leveller industry.

The Water Witch's superior design eliminates water-hammer, false triggering and overfilling while continuously monitoring your pool level.

Water Witch...

Puts your mind at rest.

Splashing = Water Loss

When you have this much activity, you want to know that your equipment is being protected… at all times.

Splashing = Fun!!

With Water Witch, you never have to worry! Just have fun!!
